

Dong Xu Concrete Mixer Trailer

Concrete mixing trailer is a kind of engineering vehicle specially used for transporting and mixing concrete.

It is usually composed of chassis, mixing cylinder, inlet and outlet device, hydraulic system, water supply system and control system.

The mixing cylinder is the core component, which is placed at an Angle and has a specially designed spiral blade inside. During the transportation process, the mixing drum continues to rotate slowly to prevent concrete solidification and segregation, and to ensure the uniformity and quality of concrete.

The concrete mixing trailer has the characteristics of strong mobility and flexible transportation. It can adapt to various road conditions and transport concrete from the mixing station to the construction site.

Product name	Concrete Mixer Trailer
Type	Semi-Trailer
King pin	2"(50mm)or3.5"(90mm)
Leaf Spring	90(W)mm*13(Thickness)mm*10(Layer)
Landing Gear	JOST/FUWA/Yahua Brand 28T
Axle	13 Ton Fuwa Brand
Suspension	Mechanical Suspension
Tire	12r22.5
Capacity	25m ³ -60m ³
Rim	9.00-22.5
Material	Stainless Steel
Function	Mix concrete or others

PS: All the parts of trailer can be customized.
